

## Professionals Supporting Professionals

**At Salvus we can also provide Safety Professionals with a range of support services that include IOSH Accredited Training and Mentoring services.**

Our MD, Andrew Furness, is the Institution of Safety & Health's CPD tutor on key subjects such as Fire Risk Assessment, CDM Regulations and Fire Risk Assessment in Construction.

His Team of qualified and highly experienced safety professionals also deliver the programmes, which have proven extremely successful over the last seven years.

The Mentoring services are based on Salvus Consulting's own internal mentoring and assessment process ensuring that all safety professionals receive the support and guidance of a Senior Professional Staff Member during their development.

Hazel Harvey who leads on CPD at IOSH has quoted the mechanisms by which Salvus Consulting develops it's staff to illustrate how CPD can work, without attending formal training on the IOSH web forums.
